

Jersey City CitiBike overview

The total number of trips has increased year on year. In 2016, male ridership increased 19.74% while female ridership went up 21.12%. In 2017 growth in female ridership outpaced that of male riders.	The average trip duration has decreased, likely due to fewer failed dockings as users become more familiar with the system. The median trip length remained fairly steady, supporting the theory of increased user familiarity with the system.	Who uses Citi Bikes in Jersey City? 25-35 year old men and women took the most trips, while younger and older users seemed to take longer trips.	The Grove St PATH station is the most popular starting point for J..
